Student Researchers, 12 STEM- Taurus

1.

The Impact of DepEd Order No. 15, s. 2026 on Students Academic Achievement at Life Institute Mariveles.

The main goal of this study is to determine the impact of DepEd Order No. 15, s. 2026 on the academic achievement of high school students at Life Institute Mariveles. Specifically, the study seeks to examine whether the implementation of the revised classroom assessment and grading system has improved, worsened, or made no significant difference in students' academic performance. It also aims to assess how the changes in grading, classroom assessment, and grade transmutation influence students' learning outcomes and overall academic achievement.

- The DepEd Order No. 15, s. 2026 introduced updated guidelines on lesson planning and learning design to improve classroom instruction by promoting flexible, learner-centered, and competency-based teaching practices. The policy encourages teachers to develop meaningful learning experiences that respond to students' diverse needs while maintaining alignment with curriculum standards. Other Research has consistently shown that effective lesson planning and instructional quality are associated with improved academic achievement, making the implementation of this policy relevant in examining students learning outcomes.

- Educational policies significantly influence teaching effectiveness and student achievement because they shape curriculum implementation, classroom assessment, and instructional practices. Recent reforms by the Department of Education emphasize authentic learning and stronger accountability in assessing student performance rather than relying solely on adjusted grading systems. These policy changes suggest that well-designed educational reforms can enhance students' academic performance when effectively implemented at the school level

Summary of Preliminary Survey Result

Demographics

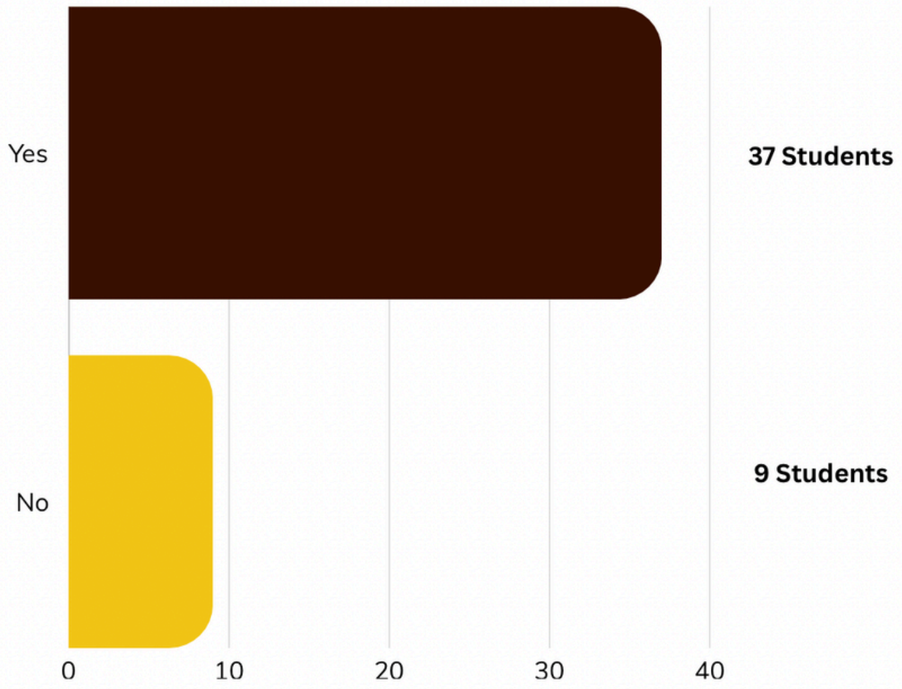

- Grade Level Distribution

Grade 7 - 6 (15%)
Grade 8 - 6 (15%)
Grade 9 - 6 (15%)
Grade 10 - 6 (15%)
Grade 11 - 8 (20%)
Grade 12 - 8 (20%)

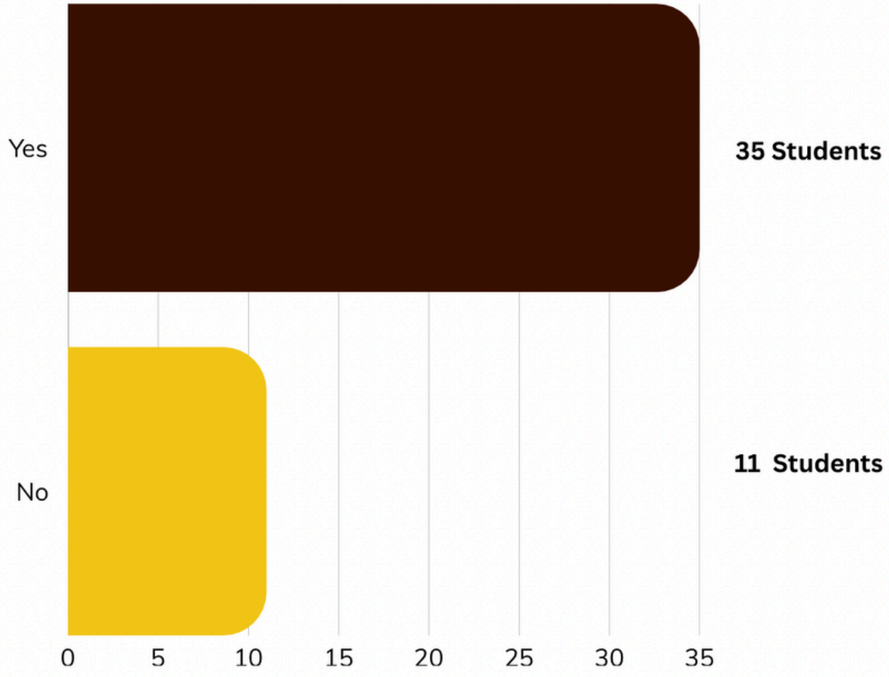

Total Number of Students: 45

Summary of Preliminary Survey Result

1. Are you aware of the implementation of DepEd Order No. 15, s. 2026?

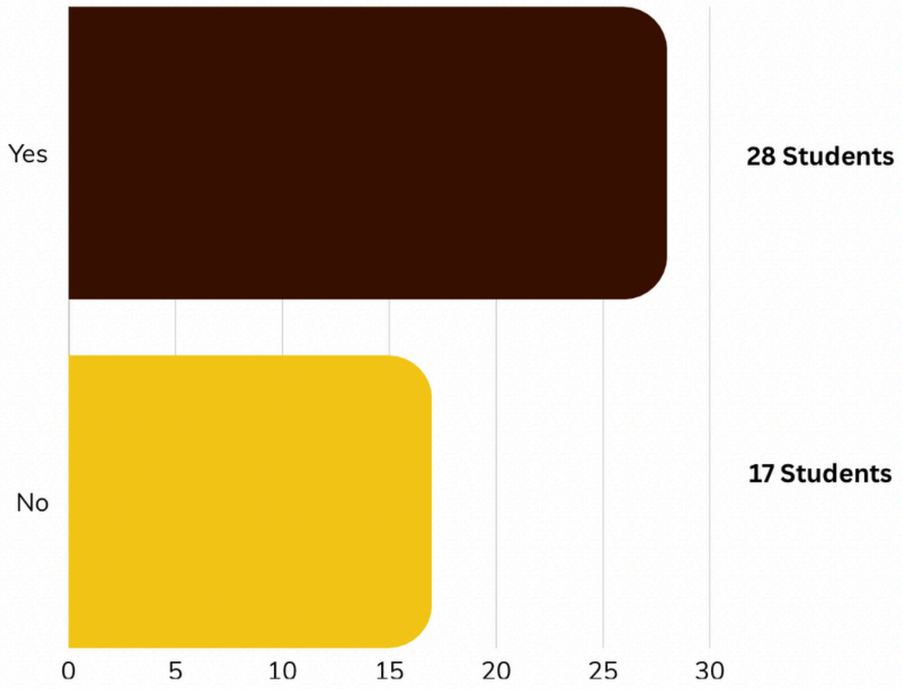

2. Do you think the new grading system accurately reflects your academic performance?

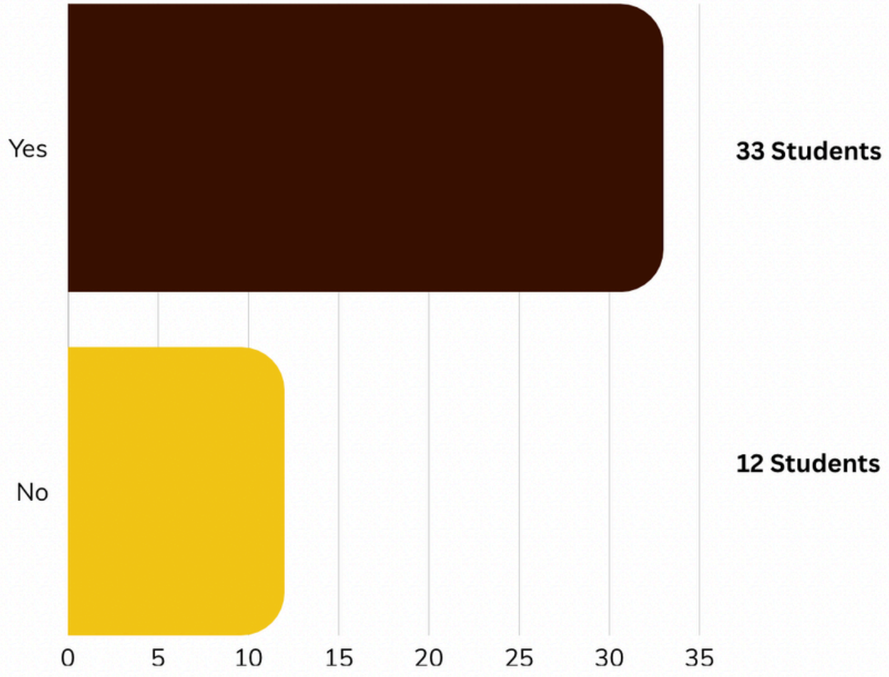

Summary of Preliminary Survey Result

3. Do you believe the new grading system is fair to students?

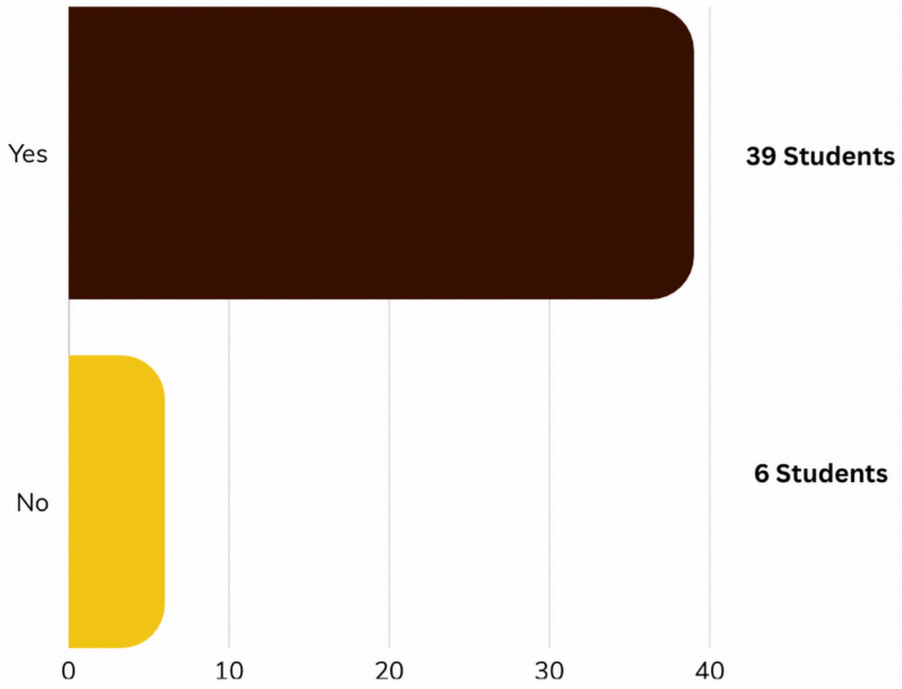

4. Do you understand how grades are computed under the revised grading system?

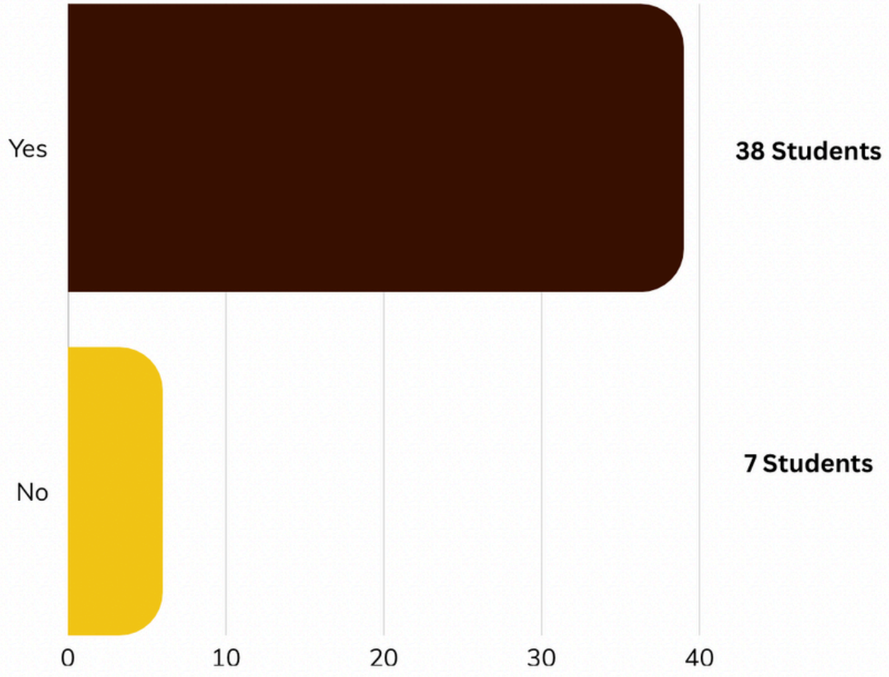

Summary of Preliminary Survey Result

5. Do you feel challenged to perform better because of the revised transmutation system?

6. Do you pay more attention during classroom discussions because of the new grading policy?

The Impact of DepEd Order No. 15, s. 2026 on Students Academic Achievement at Life Institute Mariveles.

- Main Purpose:

To determine the impact of DepEd Order No. 15, s. 2026 on the academic achievement of high school students at Life Institute Mariveles.

Independent Variable		Dependent Variable
DepEd Order No. 15, s. 2026	⟶	Students' Academic Achievement
• Revised grading system • Classroom assessment • Grade transmutation • Assessment guidelines		• Quarterly grades • General average • Academic performance • Learning outcomes

The Impact of DepEd Order No. 15, s. 2026 on Students Academic Achievement at Life Institute Mariveles.

Based on the forty-five respondents from Life Institute Mariveles, the findings indicate that the majority of the students are aware of the implementation of DepEd Order No. 15, s. 2026. Most respondents believe that the new grading system accurately reflects their academic performance and understand how their grades are computed under the revised grading system. In addition, most students reported that the revised transmutation system motivates them to perform better academically and encourages them to pay closer attention during classroom discussions.

The Impact of DepEd Order No. 15, s. 2026 on Students Academic Achievement at Life Institute Mariveles.

However, the findings also reveal that although the majority of the respondents consider the new grading system fair, a notable number of students disagree. This suggests that while students generally recognize the benefits of the revised grading and assessment policy, there are still concerns regarding its fairness and implementation.

2.

The Correlation Between Time Spent on 1xBet and Monthly Gambling Expenditures Among Adult Users in Mariveles

The main goal of this study is to determine whether there is a significant relationship between the amount of time adult users in Mariveles spend on the 1xBet platform and their monthly gambling expenditures. Specifically, the study aims to examine whether spending more time using the platform is associated with higher or lower monthly gambling expenses. The findings of the study are expected to provide a better understanding of the gambling behaviors of adult users and may serve as a basis for future research, awareness programs, or policy discussions related to responsible gambling.

- A study by World Health Organization reported that greater engagement in online gambling is associated with higher gambling expenditures and an increased risk of gambling-related harm. Individuals who spend more time using online betting platforms tend to place more bets, leading to higher monthly gambling expenses and a greater likelihood of financial difficulties.

- Research published in the Journal of Behavioral Addictions found a significant positive relationship between the amount of time individuals spend on online gambling platforms and the amount of money they wager. The study concluded that prolonged gambling sessions predict higher monthly gambling expenditures and increase the risk of problematic gambling behavior, making time spent on betting platforms an important predictor of gambling-related financial outcomes.

Summary of Preliminary Survey Result

Demographics

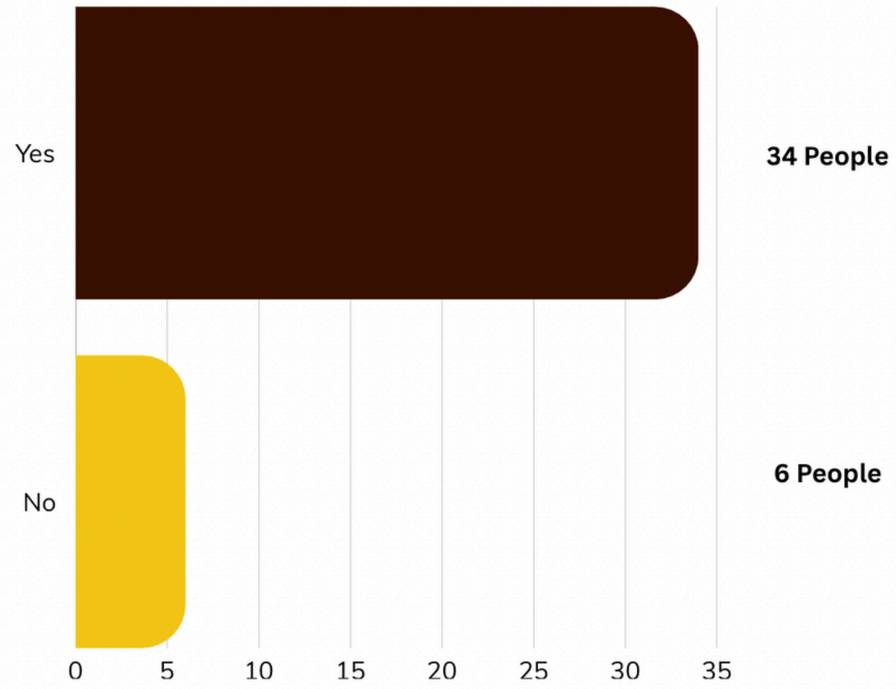

- Gender Distribution

Male - 28 (70%)
Female - 12 (30%)

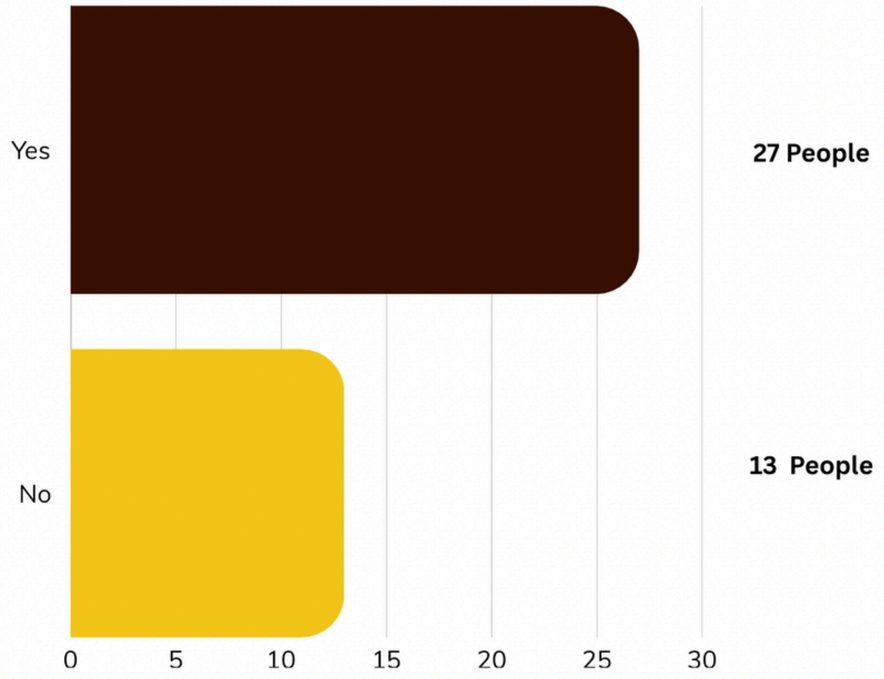

Total Number of Respodent: 40

Summary of Preliminary Survey Result

1. Do you use 1xBet at least once a week?

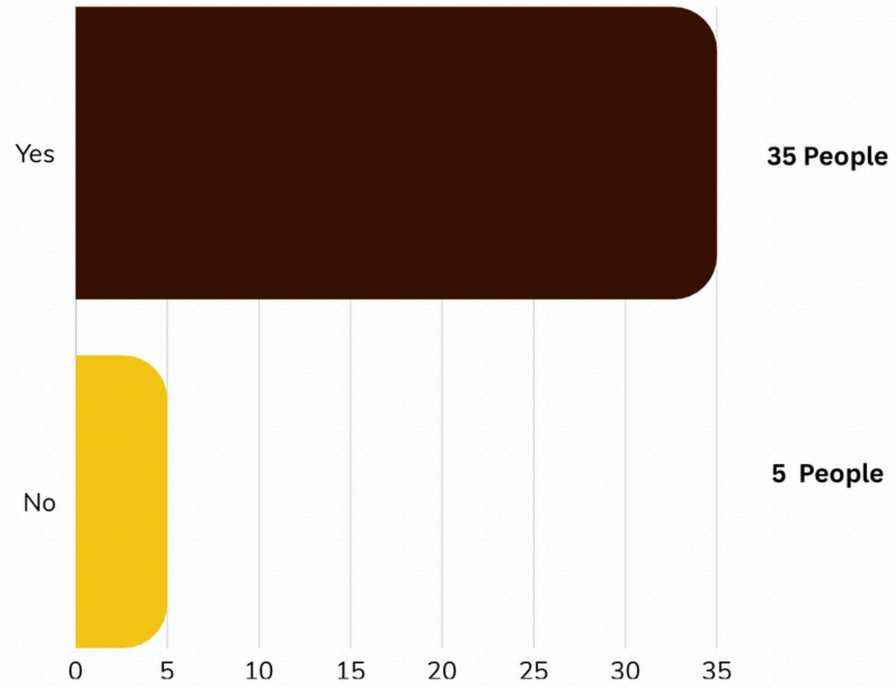

2. Do you usually spend more than one hour per gambling session on 1xBet?

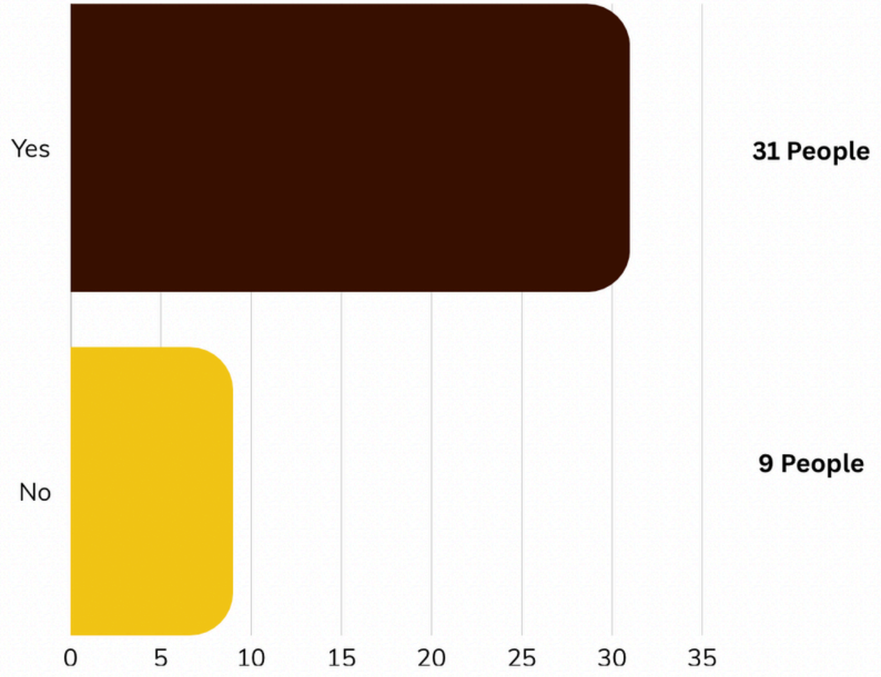

Summary of Preliminary Survey Result

3. Do you spend money on 1xBet every month?

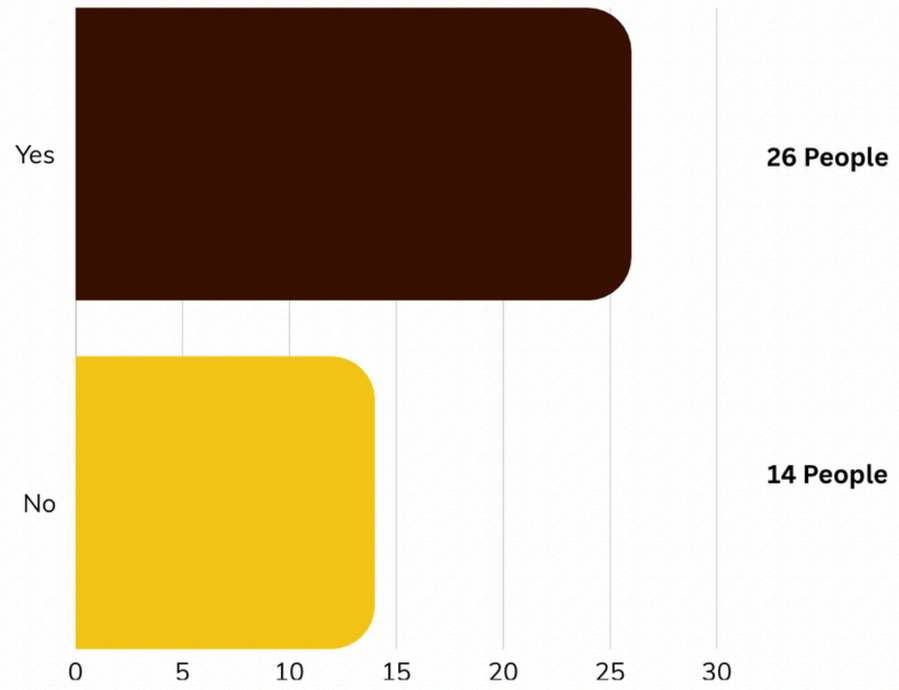

4.Do you think the more time you spend on 1xBet, the more money you spend

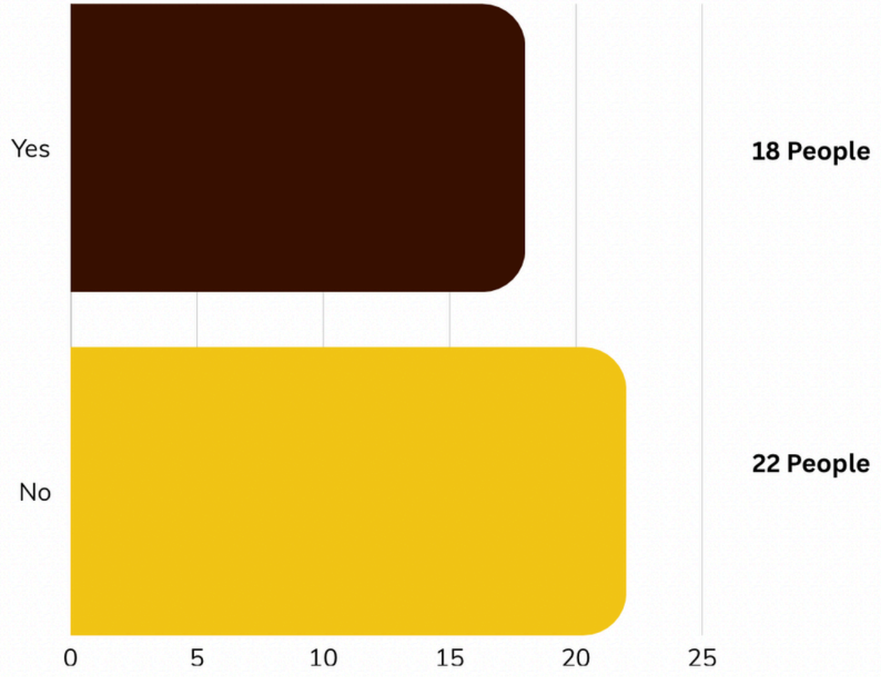

Summary of Preliminary Survey Result

5. Have you ever exceeded your planned gambling budget because you stayed longer on 1xBet?

6. Do you set a spending limit before using 1xBet?

The Correlation Between Time Spent on 1xBet and Monthly Gambling Expenditures Among Adult Users in Mariveles

Independent Variable	Dependent Variable
Time Spent on 1xBet ⟶	Monthly Gambling Expenditures
• Hours spent per day/week • Frequency of platform use • Duration of each gambling session • Overall engagement with 1xBet	• Amount spent per month • Total monthly gambling expenses • Average monthly betting costs • Monthly financial expenditure on gambling

The Correlation Between Time Spent on 1xBet and Monthly Gambling Expenditures Among Adult Users in Mariveles

Based on the forty respondents from Mariveles, Bataan. The findings indicate that the majority of the participants use 1xBet at least once a week and spend money on the platform every month, suggesting that regular gambling activity is common among the respondents. Most participants also reported spending more than one hour per gambling session and believed that spending more time on the platform leads to higher gambling expenditures. Furthermore, a majority admitted that they had exceeded their planned gambling budget after staying longer on 1xBet.

The Correlation Between Time Spent on 1xBet and Monthly Gambling Expenditures Among Adult Users in Mariveles

However, more than half of the respondents reported that they do not set a spending limit before using the platform. Overall, the findings suggest a positive relationship between the amount of time spent on 1xBet and monthly gambling expenditures, as increased time spent on the platform appears to be associated with greater spending and reduced adherence to personal spending limits.

3.

The effect of Remittance Frequency on the Financial Planning Behavior of Overseas Filipino Workers

The main goal of this study is to determine the effect of remittance frequency on the financial planning behavior of Overseas Filipino Workers (OFWs). Specifically, it aims to examine whether the frequency of sending remittances influences how OFWs and their families manage budgeting, saving, investing, and other financial planning practices. The findings of the study are expected to provide insights into the relationship between remittance patterns and financial management, which may help families, financial institutions, and policymakers develop strategies to promote better financial planning among OFWs.

1. **Saving, Buying, and Spending Patterns of Overseas Filipino Workers in the Central Luzon Region (2023) - Eric S. Parilla**

Overseas Filipino Workers (OFWs) demonstrate various financial management practices through their saving, spending, and purchasing behaviors. Their study found that remittances play a significant role in influencing how OFWs allocate their income, particularly in meeting household needs, building savings, and making financial decisions for the future. The researchers emphasized that effective financial management among OFWs contributes to greater financial security and long-term economic stability

2. Remittances and Household Outlook: Shaping the Economic Landscape of the Philippines (2026) – Neil Fidelle G. Lomibao

Remittances play a significant role in shaping the economic outlook and financial expectations of Filipino households. Using data from the Bangko Sentral ng Pilipinas (BSP) Consumer Expectations Survey, the study found that households receiving regular remittances tend to have greater financial confidence and are better able to plan for future expenses, savings, and investments. The findings suggest that consistent remittance inflows contribute to improved financial stability and encourage households to make more informed long-term financial decisions.

Summary of Preliminary Survey Result

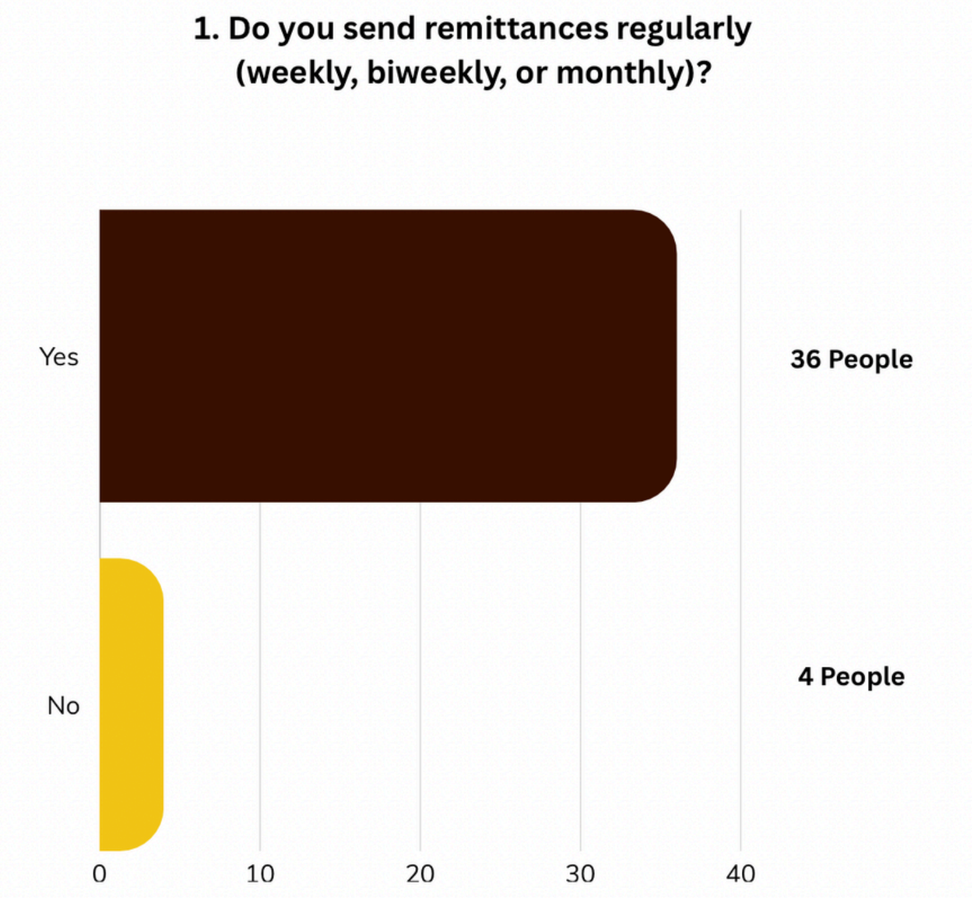

Demographics

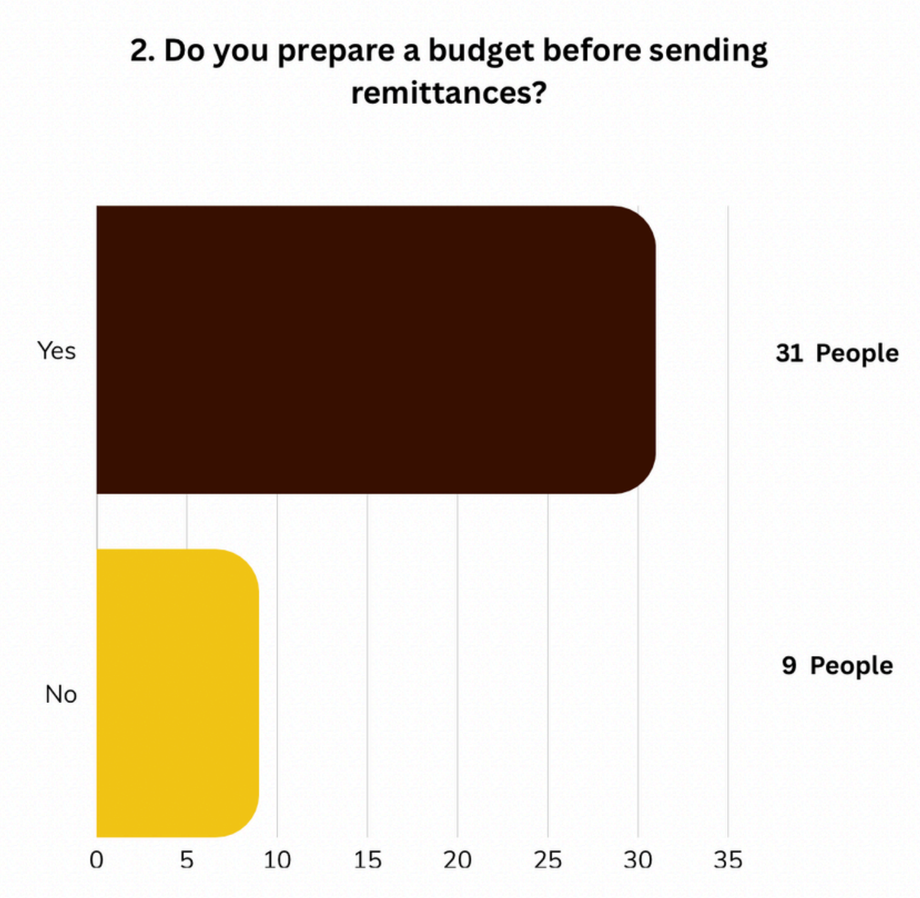

- Gender Distribution

Male - 33 (82.5%)
Female - 7 (

Total Number of Respodent: 40

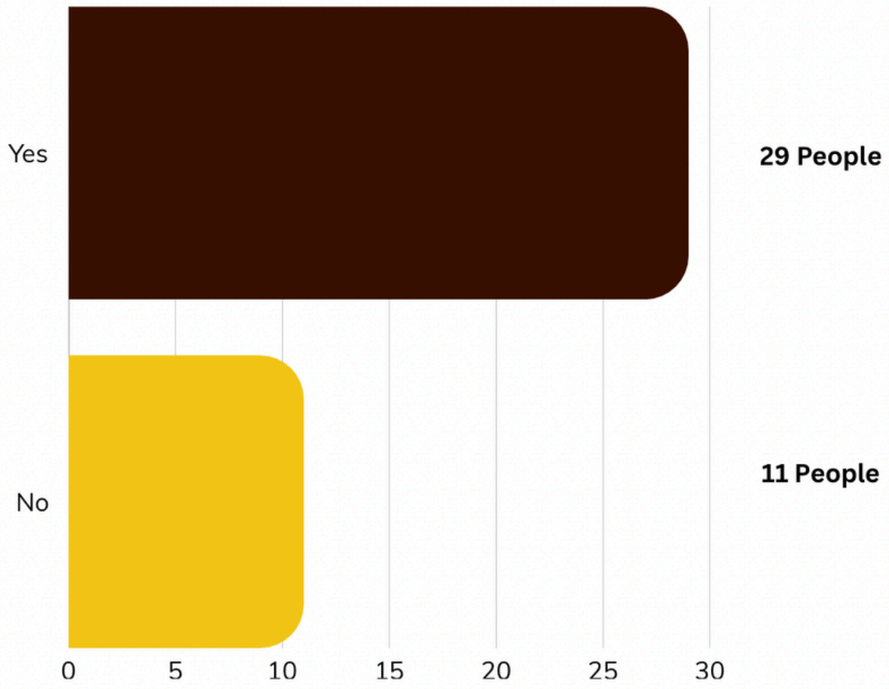

Summary of Preliminary Survey Result

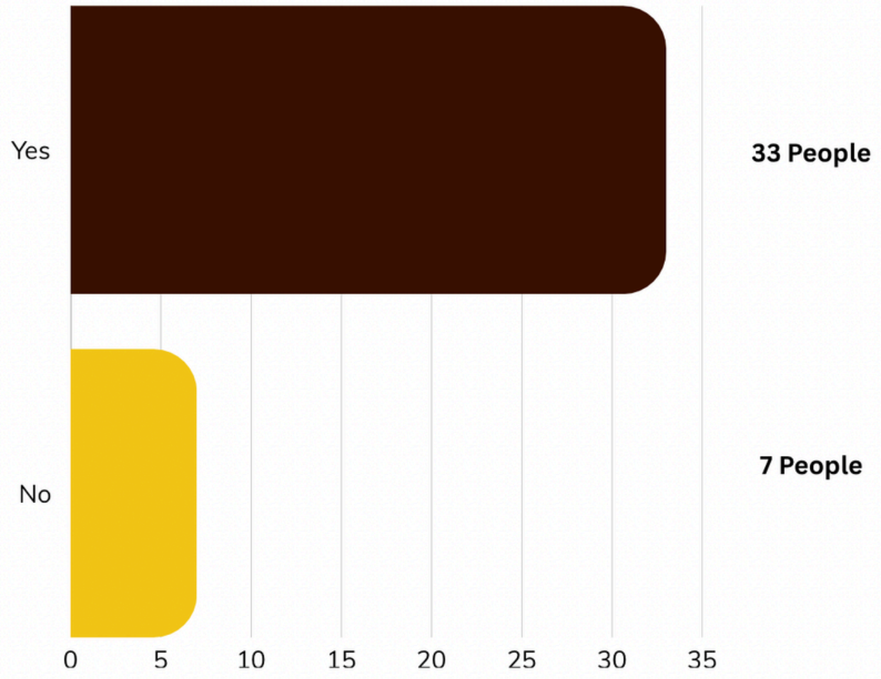

Summary of Preliminary Survey Result

3. Do you save part of your income before sending remittances?

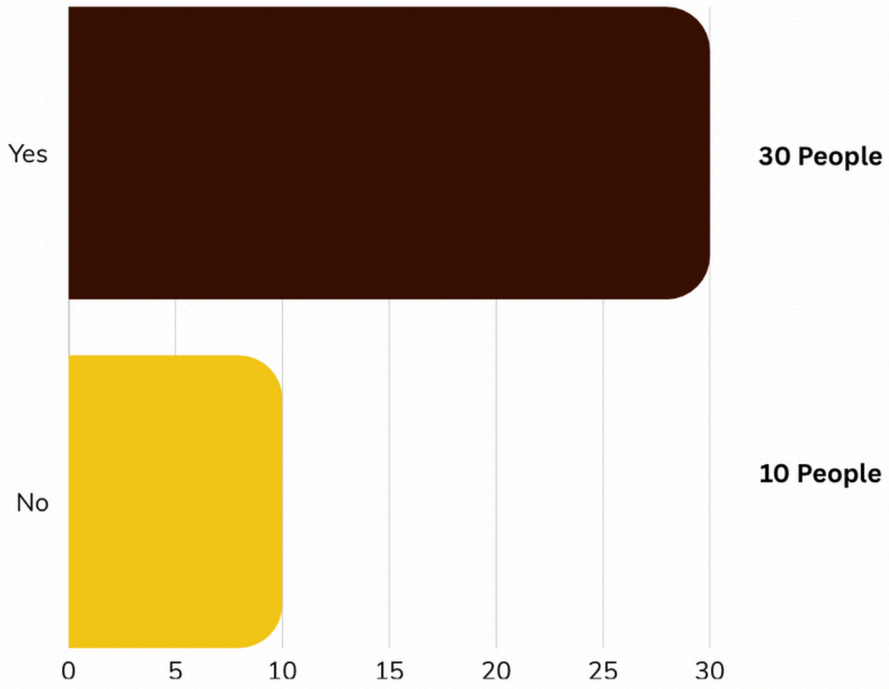

4. Does the frequency of sending remittances affect your financial planning?

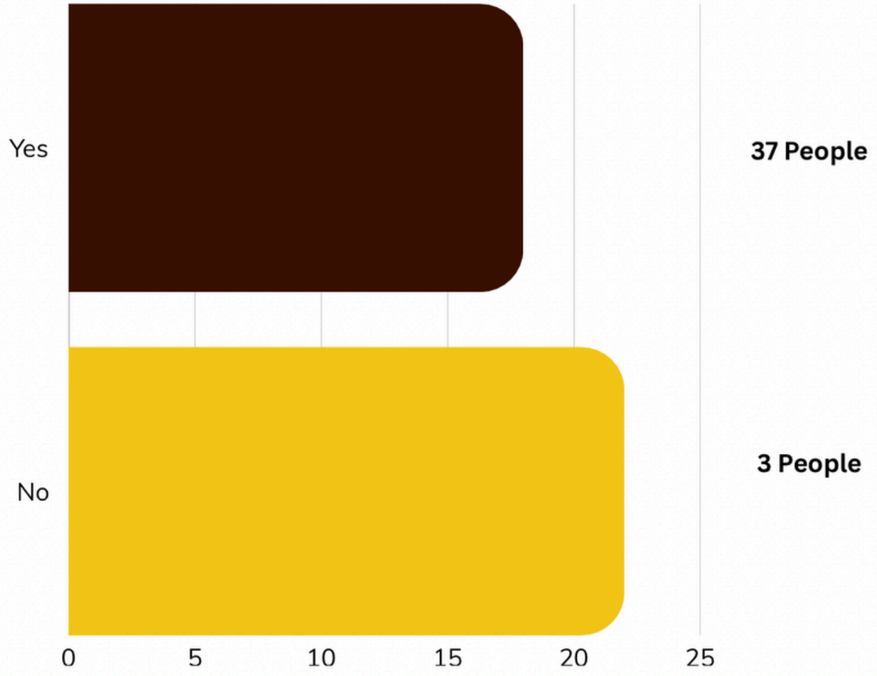

Summary of Preliminary Survey Result

5. Do you have a long-term financial plan (e.g., savings, business, retirement)?

6. Do you believe regular remittance helps improve your family's financial stability?

The effect of Remittance Frequency on the Financial Planning Behavior of Overseas Filipino Workers

Independent Variable	Dependent Variable
Remittance Frequency ⟶	Financial Planning Behavior
• Frequency of sending remittances • Number of remittances per month • Regularity of remittances	• Investment decisions • Expense management • Emergency fund preparation • Budgeting practices

The effect of Remittance Frequency on the Financial Planning Behavior of Overseas Filipino Workers

Based on the forty Overseas Filipino Worker (OFW) respondents, the findings indicate that the majority send remittances regularly, demonstrating that consistent remittance is a common practice among the participants. Most respondents also prepare a budget before sending remittances, save a portion of their income beforehand, and keep records of their monthly income and expenses, reflecting responsible financial planning and management.

The effect of Remittance Frequency on the Financial Planning Behavior of Overseas Filipino Workers

Furthermore, the majority believe that the frequency of sending remittances affects their financial planning behavior and reported having long-term financial plans, such as savings, business investments, or retirement funds. In addition, most respondents acknowledged that unexpected family expenses influence their financial planning, while an overwhelming majority agreed that regular remittances contribute to their family's financial stability.
